

## Professional Training Course Storyboard curriculum

### Week 1 Drawing for storyboarding

The first week of the course will be focused on drawing for storyboarding, going through topics like perspective and placing characters in space.

### Week 2 Introduction to storyboarding

During the week you will be building up and refining skills and knowledge that you need for storyboarding. The introduction weeks combine classes in basic filmmaking, an introduction to Storyboard Pro and lectures on storyboarding.

### Weeks 3-4: Storyboarding for 2D television animation 1

In this 2-week module you will be storyboarding a sequence from an animated TV series working from a script, learning how to get from thumbnails over beat boards to actual storyboards.

### Weeks 5-6: Storyboarding for animated feature

In this 2-week module you will be storyboarding a sequence from an animated feature film, learning about the difference between storyboarding for TV-series and feature films and getting more into acting, gag-writing etc.

### Week 7: Storyboarding for live action combined with 3D animated feature

In this 2-week module you will be storyboarding a sequence from a live action feature film that incorporates 3D animated characters and environments. Working with the director, the visual effects supervisor and the previs team is part of the process.

### Week 8: Screen writing

As a storyboarder, you work closely together with the director and sometimes you contribute to develop the story. This week you will learn the basics of script writing and get to write yourself.

### Weeks 9-10: Storyboarding for 2D television animation 2

In this 2-week module you will be storyboarding a sequence from an animated TV series just working from a storyline. This method gives the storyboarder a lot of creative space to shape the story, and you will be using your knowledge about script writing.

### Week 11-12: Portfolio projects

During the last two weeks of the course, you will be working on your portfolio, either finishing things from the previous modules or making a new project of your own choice.
